FRIDAY, JANUARY 16, 1931

No. 44

News Notes

S. E. Low was a Magrath visitor on Sunday last.

Every day in ever way things are getting better and better would be a good slogan for 1931. Let's try it.

Poley Hawkins is around now, and says his knee is alright if he doesn't happen to hit it.

A refreshment stand is opening up right south of Stone's Hardware and Grocery Store.

We understand that we will have a Senior and Intermediate team in Basketball again this year. The personnel is not known as yet.

B. R. Smoot, general superintendent of the Utah-Idaho Sugar Co. is at the Raymond Factory for awhile at present.

When will the Senior and Intermediate League get under way? We haven't heard much about these divisions.

Bills are out for the Sugar Makers' Ball on Wednesday evening, January 21. A big time is planned by those in charge, and those who are not there will no doubt regret it.

So far January weather has been something to write home about and no mistake. No snow, and no cold weather. It will be alright with most people to have this same kind of weather continue all thru January and February.

Why not gravel our street out to meet the gravelled road during this good winter?? The gravel is a long way off, it is true; but we could aid the unemployment and have this work done and off our minds.

The Red and White Store was broken into recently. It is thought it was the work of young boys, judging by what was missed, and the general appearance of the job.

A spirit of optimism is in the air regarding the future of business and conditions in Southern Alberta despite the calamity howlers who are still having their say in no uncertain terms.

Another two weeks of good weather and the road will be gravelled as far east as Spring Coulee. Boy, what joy, when we have the gravel here in Raymond. We will doubtless then be on the Greyhound route as there are Raymond, Spring Coulee, Magrath and Raley to contribute to the traffic of these fleet busses.

FLOUR WINNERS

The following were the winners of the 500 lbs. of Flour given away at the Capitol Theatre on Friday night of last week.

J. Vanderheft, 24; H. F. Allen, 49; J. T. Simpson, 24; B. R. Smoot, 49; W. G. Rouse, 24; Mrs. W. G. Rouse, 49; Byron Vance, 24; Mr. Rogers, 49; Chas. Jones, 24; Mr. Dore, 49; Marvel Atwood, 24; Mike Kosko, 49; Harry Christie, 24; Mr. Joyce, 24.

There were 8 sacks of 24 lbs. each and 6 of 49 lbs. each, and they were alternated in size for the first 12 draws. The last two being 24 lb. bags.

A NEW ARITHMETIC

"I am not much of a mathematician," said the cigarette, "but I can add to a man's nervous troubles, I can subtract from his physical energy, I can multiply his aches and pains, I can divide his mental powers; I can take interest from his work, and I can discount his chances for success."—Contributed.

No Yes Man—Evidently that young man you introduced me to to-day doesn't know who I am, said a wealthy man to his wife.

"What makes you think so?"

"If he appreciated the extent of my financial influence, he would laugh at my jokes instead of at my grammar."—Stray Stories.

Raymond Hi Wins Two First Games

RAYMOND HIGH WINS FROM MAGRATH 41-28

The High School Gymnasium was well filled on Friday night last, when the local High School quintette tried conclusions with the basket tossers from Magrath. It was no stalling match, either, and the crowd got their money's worth in the first ten minutes of play when both teams showed almost lightning speed. Playing around L. Meldrum, long centre man, the visitors swept the locals off their feet for a few minutes, but the pace was too fast and after 6 or 7 minutes, the locals hit their stride and the checking on both sides was close and constant, and the first quarter ended with the score 8-5 in favor of Magrath.

Coming back in the second quarter Raymond got their combination to working a little better, and while they were checked closely, they succeeded in ringing up 12 points in this spasm, and held Magrath's scoring to 3 points. Meldrum, the star basket getter of Magrath, was ruled off for fouls in this quarter, and for a few minutes the team could not find each other after the change.

During the intermission the locals changed their sweaters, as Magrath had yellow too, and the colors caused a little confusion amongst the players. The second half started with both teams bent on victory, and never a chance was lost in the efforts of the boys either to block a play or get a basket. During this period Raymond got 10 points and Magrath 4. One Magrath man hurt his ankle and was forced out of the game, and Kenneth Hague was ruled off for fouls. The game, however, moved on fast and furious.

The last ten minutes was possibly the most exciting of the game. Before many minutes of play, Evans of Magrath was ruled off for personal and having no more subs, Magrath had to finish with four men. They went right after it, and in this period, despite this handicap they run in 12 points. Raymond made a number of pretty combination plays that accounted for 15 points in this period, which ended the game with the score showing, Magrath-38; Raymond-41.

The game was fast throughout, Magrath being determined to win, and the locals being determined they should not. It was a battle royal, and when the return game is played in Magrath, there will be plenty of speed and all the science displayed that can be used.

Hod Seamans and Tommy Ferguson of Lethbridge handled the whistles and despite the speed, kept the game well in hand at all times and gave excellent satisfaction, so there was no room for any argument.

Both teams were working well and the players used showed some outstanding point of strength. Raymond used three forwards, and it made no perceptible difference to the remainder of the team, as to who was in the centre, the combinations went on and the scoring continued. Nearly all the locals got a chance on the floor, and this made all of the boys feel good, as no one likes to do nothing but warm benches. If they are on a team, they like to get into the picture once in a while, and lacking this impetus, they are bound to lose interest in their training and fail to give of their best. That it is dangerous to build a team around one man, and one man only, goes without saying, and the only way to overcome this is to give all the boys a chance and break up the regular lineup into all conceivable pieces, so that a man off for fouls, sprained ankle or any of the thousand and one things that may happen, will not disrupt a team, especially if some of these happen in a really close and hotly contested game, as Friday's promised to be, up to the time that Magrath lost their centre. After that they were

RAYMOND GETS REVENGE

The Browning High School were here for their return game on Saturday night last in the Opera House, when the local quintette trimmed their opponents to the tune of 59-33 before a crowd that packed the Opera House to the limit of space.

The game opened up at a whirlwind pace and Browning notched two or three spectacular baskets, and played a tight five man defence. The local boys played them basket for basket pretty well and at the same time were able to crack the five man defence, and when they did this the visitors were not nearly so dangerous. Both teams received generous applause from the crowd on every play.

The first quarter ended 11-11, and both teams playing fast and working hard and effectively. In the second quarter the locals commenced drawing away from their opponents, and the second quarter showed 16 points for Raymond, as against 7 scored by Browning. The third quarter was a repetition of the second, showing 16 again for Raymond, and 9, for the visitors. The fourth quarter was again fast and furious, but the local boys were able to keep up the pace, and in this frame, Raymond scored 15, while Browning scored 4.

There were 14 fouls called in the game on Raymond, and 15 on Browning and one Raymond player was ruled off for filling up his quota of fouls. Some of the fans were just a little disappointed at not seeing the visitors show a better brand of ball. The size of the hall may have had something to do with it. They had a long trip too, which would not help, but no longer than our boys have when they go to Browning. But all in all it was a good game and everyone received their money's worth.

The local boys played good fast ball, good team work, and we are more optimistic than ever that they will again win the basketball championship of Alberta's High Schools.

Losing to Browning three times by three points each game, their total last night more than offset these points.

Ken Stone and a Browning man kept the game well in hand throughout, and gave very satisfactory decisions.

A preliminary game between the Midgents and the Juniors of the High School was played while the crowd gathered which was refereed by Gray Kirkham.

Following the second game a dance was held under the auspices of the Raymond Athletic Association which was well attended and thoroughly enjoyed.

A few minute dancing concluded the Mutual Meeting at the Raymond First Ward on Tuesday evening.

Quite a number of people from surrounding towns were here for the Basketball Game and Dance on Saturday night.

Funeral Services

Funeral services over the remains of the four month old baby of Mr. and Mrs. Fred Ralph, were held in the Second Ward Chapel on Thursday Jan. 8 at 2 p.m. with Bishop J. H. Walker in charge.

The speakers were T. O. King, J. W. Evans, and Bishop Walker, all of whom offered words of comfort to the sorrowing parents. Vocal solos were rendered by Mrs. Emma Barr and Bishop Walker, and singing by the congregation.

A large cortege followed the remains to the cemetery where interment was made.

The little child died of pneumonia, following whooping cough.

The sympathy of the community is extended to the parents in their sorrow.

OFFICIAL STATEMENT SUMMARIZING THREE YEARS TESTS WITH COMMERCIAL FERTILIZER CONDUCTED ON THE DOMINION EXPERIMENTAL STATION LETHBRIDGE

For the last three years considerable interest has existed in the use of phosphate fertilizer on the prairies, and extensive experiments have been conducted by Dominion and Provincial Government institutions and by private corporations and individuals to learn more regarding the possible value of phosphates when added to soil of the prairie farms.

The Dominion Experimental Station at Lethbridge is one of the institutions conducting these experiments and has used triple superphosphate and other fertilizer on irrigated sugar beets, alfalfa and wheat and on dry-land wheat after summer-fallow and after wheat. The following summary of the results of these experiments may be of interest to the farmers of Southern Alberta.

SUGAR BEETS — IRRIGATED
Sugar Beets promise to give the greatest financial return from the use of phosphates of any crop so far included in the experiments, due to the relatively high cash value of the crop and its response to fertility factors, and it seems safe to recommend the use of phosphates on almost all of the irrigated sugar beet fields of Southern Alberta.

So far increases as great as four tons per acre have been secured at the Station and the average last year from the application of 100 lbs. of triple superphosphate was about two tons per acre. Two tons of beets were worth more than five times the cost of the fertilizer used.

The results at the Station are similar to those obtained by numerous farmers who have used fertilizers on their sugar beets except that some have secured greater increases in yields than have been obtained at the Experimental Station. The most significant feature is that profitable increases have been secured with almost every trial.

Ammonium phosphate has given results equally as good as superphosphate but the use of potassium does not appear to be warranted on the soils where tests have been made.

ALFALFA — IRRIGATED
Fertilizer tests on alfalfa have been conducted for only one year at the Station, and triple superphosphate was the only fertilizer used. This was drilled to a depth of one inch in strips through an old alfalfa field at the rate of one hundred pounds per acre.

The influence of the phosphate was easily seen when driving by the field due to the ranker growth of the crop where the fertilizer was applied. The increase in yield was not as great as the appearance of the crop indicated, however, being a total of 0.53 tons per acre of cured hay from the two crops cut. If hay were worth \$5.00 per ton in the stack, this increase would just about pay for the fertilizer and the cost of applying the same.

The significant effect on the vigor of growth is, however, indicative that further trials are desirable, as is also information concerning the influence of the phosphate the second and third year after application.

WHEAT

Fertilizers were applied to spring wheat on both the irrigated and dry-land farms at the station.

IRRIGATED: Triple superphosphate was the only fertilizer used for irrigated wheat and it has been under test for two years. In 1929 the fertilizer was applied by hand and no noticeable results were secured. In 1930 the wheat and phosphate were seeded together with a combination grain and fertilizer drill and the grain thrived better and was slightly more vigorous on the fertilized plots. This increased vigor persisted throughout the year and the fertilized plots matured three days earlier and gave an average yield of 7.2 bushels more wheat than did the unfertilized plots.

DRY-LAND: In 1928 superphosphate was applied at the rates of 25,

Slicing Was Finished Early Wednesday

After a steady run of 111 days, the Sugar Factory finished its slicing well prepared land where the seed will have every chance for early and complete germination, and a seed bed that will make every hour of sunshine mean more tons per acre of beets, and more pounds of sugar per ton of beets. Grow more beets, grow them on well prepared land, increase your yield through proper and timely cultivation and through the use of fertilizers and you will have an earlier crop, and make more money on less land.

It has been intimated that the guaranteed price per ton will have to be reduced a little this year. This is not good news, 'tis true, and yet beets could be grown at a reduced price if we could increase our yield by four use of our products by feeding up our tops and beet pulp. Don't give up beet raising. We need this industry, and the advantages that we all get by its being established here. Last year's crop was a record breaker. It may not be repeated this year in tons, but it can be in better beets, and a higher sugar content, and again showing a splendid cash return.

(Continued on page 4)

NEW BRANCH MANAGER

Announcement is made of the appointment of Charles D. Compton as manager of the local branch of the Bank of Montreal to succeed C. C. Watson, who has been given charge of the Wetaskiwin branch.

Mr. Compton began his banking career at Wetaskiwin in 1913 with the Merchants Bank of Canada now merged with the Bank of Montreal. Not long after the outbreak of the war, he went overseas, and during his service was twice wounded. In 1921 he was appointed manager of the Penhold branch, and since then he has served successively as manager of stores, mean better roads, better schools, better home and a higher standard of living; and these things mean more population, a better town and a contented populace.

A large acreage is planned for beets for this year, and all beets that

Health Service

OF THE
Canadian Medical Association

Edited by
CRANT FLEMING, M.D., ASSOCIATE SECRETARY

NO ONE NEED HAVE DIPHTHERIA

Diphtheria germs, like most other disease germs, select certain parts or tissues of the body in which to settle down, grow and multiply. Diphtheria germs, for example, are usually found in the throat or nose.

It is not the germs themselves which directly injure the body and cause disease, but rather the poison or toxin which they produce. The germs remain localized in the throat and nose, but the poison which they give off is carried in the blood to all parts of the body, and so, all parts are subjected to damage by the poison coming from the germ which lie in the throat or nose.

When the body is attacked by diphtheria toxin or poison in this way, it immediately seeks to protect itself, and it does so by producing diphtheria antitoxin, which counteracts or neutralizes the toxin or poison produced by the diphtheria germs.

If the diphtheria antitoxin is produced quickly enough and in sufficient quantity, the body is victorious, the toxin is overcome and the patient recovers. Not only does recovery take place, but as a result of its experience dressed to the Canadian Medical Association, the body is prepared for a time at least, to prevent a recurrence of will be answered personally by letter.

The disease. That is why second attacks of diphtheria are comparatively rare.

Unfortunately, in many cases, the body is unable to produce diphtheria antitoxin quickly enough or in the quantity required, with the result that the patient succumbs. This is what happens in about one thousand cases each year in Canada.

Fortunately, diphtheria can be prevented; protection against this disease can be gained without facing the suffering and danger of death associated with the disease.

The infection of diphtheria toxin are perfectly harmless, and they render the person receiving them immune or protected against diphtheria, just as he would have been protected by an attack of the disease, but without suffering or danger.

Parents can free themselves from worry lest their children contract diphtheria. Lives can be saved and suffering prevented. The family physician is ready to give the necessary injections of toxoid which immunize the person who receives the injections and protect him from diphtheria.

Questions concerning Health Education, place, but as a result of its experience dressed to the Canadian Medical Association, the body is prepared for a time at least, to prevent a recurrence of will be answered personally by letter.

YOUR RESOLUTION!

(By J. D. Skinner)

"RESOLVED that my support to the home town paper in 1931 will be 100 per cent."

Now this would be a rare and vital resolution and in the keeping of it there would be great reward. Rare because you have never before seen or heard of it; vital, because the future of the small town depends upon the keeping of it.

A few years ago an able and arresting article was written by an editor of a small town weekly in Alberta. The business men of the town were complaining because of the heavy toll being taken by mail order houses. During the year the combined amounts spent by the local merchants in advertising was only a fraction of that spent. In the same area, mark you, by one mail order house. The advertisements of the local merchants had few, if any, illustrations, and lack of care in their preparation was very much in evidence. On the other hand the catalogues of the mail order house was attractively illustrated and written in a concise and gripping style. The article clearly demonstrated why the home town merchant and the home town were losing out.

A prominent merchant in a small British Columbia town does not advertise in the home town paper. He contends that it is a waste of money, because the people in the town and district know where to find him. The people also know where to find the mail order house, but the mail order house is alive to the necessity keeping its message constantly before the people. Here I was told from a well informed source that more money went out of town for merchandise than was spent locally.

A little reflection reveals the fact that the home town merchant is not saving that which he does not spend in advertising, but that he is actually paying for the advertising done by the mail order house. How come? Part of this net earnings of mail order house in a given section of town is advertising in that section. Because of effective advertising on the one hand and the lack of it on the other, that money is being withheld from the home merchant, so that in the last analysis at the expense the mail order house advertises at the expense of the home town merchant.

Now I am not thinking of advertising in the sense of contracting for, paying for, and "filling" space in the local paper. I am thinking of a wide awake merchant presenting his message each week to the buying public in a compelling style. And if the ad writer would just visualize an audience of anywhere from a few hundred to a few thousand people he would soon get away from the tragic practice of "something to fill" up for this week.

Many of our once thriving towns are going to stage a come back in 1931. This is going to be done through advertising. Advertising took the business away while the home town merchant slumbered and slept, but the home town merchant has been aroused and the lost business is going to be won back through advertising. More and better advertising will make a prosperous paper and a prosperous paper will make a prosperous town.

And this is why the people of the home town should resolve to give a 100 per cent support to the home town paper this and every year.

News Notes

Will Rogers latest "Lightnin'" Monday.

It is reported that the Borden Milk Co., manufacturers of condensed milk in a variety of forms will enter Western Canada and that they had bought a dairy at St. Boniface, Man., with a factory site in Winnipeg.

"Lightnin'"—Will Rogers—Monday Capitol NUF SED—

A rumor has been started that H. W. Wood president of the U.F.A. will resign as leader at the forthcoming convention Mr. Wood has refused to comment on it. Robt. Gardiner, M.P. for Acadia and Progressive leader in the House at Ottawa has been mentioned as a possibility for the position.

The Small pox Quarantine was lifted on the town of Barons on Wednesday after no new cases breaking out and 1,250 submitting to vaccination. School was also resumed on that day.

CARD OF THANKS

We wish to express our sincere appreciation and deep gratitude to all the kind friends who assisted during the sickness and at the death of our loved baby. We especially wish to thank the following for their beautiful floral tributes. Mrs. Ralph; Ralph Brothers; Mr. and Mrs. DeLoss Lund; Mr. and Mrs. Arthur Jensen; Mrs. A. Jensen; Mr. and Mrs. Andrew Walton; Mr. and Mrs. W. F. Barrett; Mr. and Mrs. F. Shaw, and one wreath without a name.

Mr. and Mrs. Fred Ralph

Welling News

Henry VanAcker who has been in the hospital for some time recovering from an operation is now home and will soon be back to school.

Mrs. Coleman from Lethbridge is spending a few days with her son Mr. V. A. Coleman the principal of the Welling School.

After Mutual last Tuesday the crowd spent the evening in playing games and feasting. They had ice cream, cake and hot dogs. It was well attended and a very good time is reported.

Conjoint meeting was held at the Welling Church on Jan. 4. Mr. Alvin Dilbeck Dean Wilde, Leora Peterson and Mrs. Katie Wilde were the speakers. There was also a double mixed quartette.

Here and There

(881) Inaugurated in 1926 in answer to the demands of rapidly increasing travel between Montreal and Boston, the "Red Wing", fast running Canadian Pacific night express between the two cities will have forty minutes cut from its schedule of and after January 11, leaving Montreal, forty minutes later than before, but arriving at Boston at the same time as on the former schedule. The train will leave the Windsor station, Montreal, at 9:55 instead of 9:15 as heretofore. The "Red Wing" is an all-steel train with all equipment of the latest type.

Appointment of W. R. Patterson to be deputy general auditor of the Canadian Pacific Railway, is announced by E. E. Lloyd, Comptroller of the railway. He is succeeded in his late position of auditor of disbursements by Charles B. Gordon. Mr. Patterson is one of the youngest men holding important offices in the Canadian Pacific Railway, having been appointed auditor of disbursements four years ago at the age of 36. Mr. Gordon was comptroller of the Kettle Valley Railway in British Columbia, prior to his new appointment.

A motor cycle and side car carrying two men and towing a man on skis, awoke the silence of Lake Louise December 28 when at nearly 6,000 feet altitude it roared around an improvised track at a speed above 50 miles an hour. It was the first time in history that a motor cycle has been on Lake Louise, the first motor cycle ski-joring that has taken place there and the first time a motor cycle has travelled under its own power from the Prairies to Lake Louise in the depth of winter.

On the stroke of midnight of December 31st, last one of the most remarkable railroad careers in the Maritime Provinces ended with the retirement of Charles H. S. Henderson, dean of Canadian Pacific Railway conductors. Mr. Henderson became a train conductor in 1878, at the age of 17 on the New Brunswick railway between St. Stephen and Edmundston. He completed 54 years of service with this railway and the C. P. R. December 31. He has been conductor on the trains of three successive presidents of the Canadian Pacific.

Scheduled to play at least 25 games in less than three months in practically every capital of Europe the Manitoba University graduates hockey team sailed from Saint John aboard Canadian Pacific liner Melita for Liverpool, January 2. They will return to Canada from Liverpool at the end of March.

The "Corn Belt" of North America has in the last few years slowly pushed its way north and today many parts of the prairie provinces of Canada are producing corn of different varieties and of high quality. At the fifth corn show under the auspices of the Saskatchewan Corn Growers Association, one of the finest exhibits of corn in the history of western Canada was on display.

A recent official report states that over 55,000 lbs of the eight-armed octopus were caught in 1928 and over 25,000 lbs in 1929. The fish is eaten chiefly by Orientals in British Columbia and brings between five and ten cents a pound on the market. The catch is the incidental product of other fishing operations.

Council Meeting Notes

The Council met in their regular meeting last Thursday, and went over the accounts of the past year and prepared them for the auditor, and as soon as they are gone over, the financial statement will be available for the perusal of the public.

A delegation was heard asking that the Council Chamber be used as a reading room for the use of the public. The Council deferred any immediate action but appointed a committee of Councilmen T. W. McDerm and Wm. Redd to meet a committee representative of all of the churches in the town, and find out their desires and wishes, and then report back to the Council before taking any definite action.

Seats made of fir were ordered for the Council Room sufficient to seat approximately 60 people.

Nomination Day will be the first Monday in February, with elections one week later, Feb. 9th. The term of Mayor Cope and Councilmen McDerm, Meeks and Lamh has expired on the Council. J. U. Alfred and Wm. Clemis have completed their terms on the school board, and these five, or others in their stead will be elected on Feb. 9th.

The Annual Ratepayers Meeting will be held on Friday, Jan. 30th, in the New Town Hall.

Temple Excursion Is Decided Success

A remarkable event transpired when on January 8th the Returned Missionaries of the Taylor Stake went in a group to the Christon Temple. This excursion was sponsored by the Returned Missionary Fraternity of the Taylor Stake and the success of the enterprise may be attributed largely to the very splendid efforts of the officers of the various Ward organizations. The Caravan of approximately One Hundred and Twenty Five people, consisted of Seventy Five or more persons who had been to the Nations of the Earth on Missions, the remainder being partners. Special sessions were arranged for this Company only, and a real "Spirit of the Mission Field" prevailed throughout the entire day.

The morning of the 8th dawned clear and beautiful, no sign of storm and the roads were in excellent condition. A glorious picture greeted the eyes of all members of the Caravan as the rays of the rising sun fell in splendor upon the House of the Lord, and all souls were thrilled as they neared this Holy Sanctuary.

The first session commenced at 10:30 a.m. and was of such a nature that it will long be remembered by all participants. Elder S. I. May, Stake chairman of the Returned Missionary Fraternity was first called to occupy a portion of the time, and bore a strong testimony of the Gospel also spoke words of appreciation for the efforts of all present in putting over this successful excursion. President Wood then asked that all who had filled Missions in various parts of the world to come to the front of the assembly hall and sing "Ye Elders of Israel." It was sung with the Spirit of True Missionaries pouring out their souls in song. No greater testimony could be borne to this great Latter Day Work, than the sight of these seventy five Ministers of God uniting their voices in this well known Missionary hymn of praise.

After the singing of this song several calls were made among the Missionaries. The first one was for the oldest Missionary present. Elder Fletcher of Magrath, 81 years of age was the oldest and he was asked to bear his testimony. He told of how he was promised during the early years of his life, that he would go on a mission in his old age and at the age of Sixty Two this promise was fulfilled. His testimony had not dwindled but rather, had grown with the years. Elder E. S. Heninger Jr. the most recently returned Missionary having been home only ten days. He was called to bear his testimony. One Missionary had filled a Mission as early as 1882 and another had been called to preach the Gospel at the early age of Seventeen years.

As a closing number the Raymond 2nd Ward sang a Double Mixed Quartette "Jesus My Savior."

The second session commenced at 4:30 p.m. was not so large in number but the same spirit was there. The usual meeting in the assembly room was imbued with the inspiration of Missionary hymns, and fervent testimonies to the Gospel by several of the members, including A. E. Hancock, and Byron Vance. Pres. E. J. Wood also made some very instructive remarks to impress upon those present the necessity of Temple work and the order that prevails in Celestial government.

By 10:30 p.m. the majority of the caravan had started for home, well pleased that they had put forth the effort to go. Of course there were the usual number of flat tires, broken car springs and stubborn motors, but with all of these difficulties we may truly say, "By faith all things are possible," for all made the journey in safety.

So far as we have any record, this is the first excursion of its kind to take place in the entire Church, and we hope it will be but the first of many like it. The Returned Missionaries, in forming this new organization, have taken upon themselves a great work, and this Missionary Temple Excursion, will be very influential as a starter in helping them to get back "into the harness." Indeed, all who helped to put this event over will be ready and anxious for a similar trip to the "House of the Lord."

By a Member of the Company.

Mr. and Mrs. A. E. Hancock and Mrs. Stan Cook were Magrath visitors on Wednesday and Thursday of this week with relatives and friends.

George Bernard Shaw's first talk in "How She Lied to Her Husband" was condemned by all the critics recently as melancholy, stagey, dull and lifeless. It was shown in London.

News Notes

Alvin Jones was a Magrath visitor on Wednesday of this week.

"Lightnin'" hits the funny bone of the world.

Ross R. May was a Raymond visitor on Wednesday of this week.

Remember Will Rogers Monday in "Lightnin'" better than "So This is London."

Lee Brewerton was a business visitor in Calgary the first part of the week.

All we need now is the return of the birds and we will have spring without any winter.

Quite a number of local people were in Stirling Wednesday evening for the Basketball game between the Idlers and Stirling.

The U.F. and U.F.W.A. conventions are being held in Calgary next Monday and succeeding days. Local delegates will be in attendance.

Wednesday and Thursday seen the departure of quite a number of Sugar Factory employees for their homes following the completion of the campaign.

LOST—Purebred Berkshire Boar pig, weighs between 400 and 500 lbs. Left my farm south of Raymond on January 6th. Notify N. L. Atwood, Box 132, Raymond.

New license plates will have to decorate your car by February 1st, if you keep on good terms with the officers of the law. It's too bad we can't buy them on the installment plan this year.

Dr. R. Neidig of the Consolidated Mining and Smelting Co. Limited, of Trail, B. C. was here in a plane last Friday and arranged for a meeting on Friday night to talk to farmers and others interested in Fertilizer and its uses.

The local Scout Council met at the home of Mrs. M. W. Boyson Wednesday evening. The annual election of officers was held and Mrs. Boyson elected delegate to the Provincial Annual Meeting in Edmonton on Saturday.

A birthday party in honor of Mr. Eveson was held at the Eveson home Wednesday evening with about 20 guests present. The time was spent in games, singing and dancing and a delicious lunch concluded the evening's fun.

The Idlers won from Stirling on Wednesday night by the score of 29-40, a two minute rally at the last turned defeat into victory for the locals. Seven up and two minutes to go looked like a victory for Stirling but the Idlers finally beat them one point.

Speaking to the convention of the Alberta Federation of Labor in Calgary on Monday Premier Brownlee sounded a note of optimism for the future prosperity of Alberta, and stressed the need of co-operation on all sides to assist in this economic recovery.

Viscount and Viscountess Willingdon left Canada on Wednesday of this week for London, and after a brief stay there will continue on to India where His Highness has been appointed Viceroy.

W. A. Oxner, accountant in the Bank of Montreal branch at Wolfville, N.S. was arrested on Monday and will face a charge of theft of \$25,000 from the funds of the bank.

"The King of Klags" is returning again Thursday next week at Bargain Prices. If you seen this mammoth production once you will need no further invitation. If you haven't seen it, then be sure and be there. You should not miss it.

The opening Social of the W.I. was held in the United Church Jan. 8th. The first feature of the evening was a program readings being given by Mrs. B. Peterson, Mrs. Keith and Mrs. C. Nilsson. Mrs. Nilsson's reading was one of her own compositions. Mrs. D. Watson and Ira McBride rendered vocal solos. The later part of the evening was spent playing games lead by Mrs. S. B. Card and Miss Inez Lamb. Refreshments were served at the close. Thirty nine ladies were present.

BROWNING SENIORS HERE SATURDAY NIGHT

Basketball fans are promised a game packed with interest tomorrow night when the Browning Seniors will be here to oppose the Union Jacks in the Opera House. This main game will get under way at 8:30 sharp, so be on hand if you want to see all of the fun this game offers. There will also be a good preliminary between two local teams but just which teams has not been announced yet. The preliminary will commence at 7:30 and a jittery dance will conclude the evening following the two games.

The Jacks have no change in personnel this year, but we are assured that the present group have all the speed and tenacity of the old warriors, although lacking of course in that experience which the old players had gained in years of playing and tours which took them to many distant points. The present group have speed backed by good experience in hard fought games, and their work together this year has been sufficient to make them a fairly smooth working machine and able to offer real opposition to all comers.

Both games Saturday night will cost you 50c., so be on hand and see the start of an interesting Basketball season.

R. C. JESSUP, OF NANTON TAKES OVER MACLEOD PAPER

The Macleod Times, newspaper, changed ownership on January 2 when R. C. Jessup, of Nanton took over the plant, owned by D. J. Grier and formerly operated by S. Dillingham.

Mr. Jessup is a young man with a wide practical newspaper experience. He has grown up from early boyhood days in the newspaper office of his father, editor and owner of the Nanton News since 1905, and R. C. has been a partner in that business since 1919. Seeking a wider scope for his energies, Mr. Jessup was successful in negotiating the taking over of the Macleod Times, and he hopes that in due time, he will also be able to show that Macleod can produce one of the best papers in the province. Mr. Jessup has decided to change the name to "The Macleod Gazette" and thus revive the name of the first newspaper published in Macleod—Clareholm Press.

Retirement Closes 53 Years' Service

Over 53 years ago, a 14-year-old boy joined the old Toronto Grey and Bruce Railway, as an apprentice in the Motive Power Department. Today, the retiree of Robert Preston, superintendent of motive power, Eastern Lines Canadian Pacific Railway, closes a career which is something of an episode in the history of Canadian railroading and has extended from one ocean to the other in many important appointments. Starting his actual service with the C. P. R. as soon as the T. G. and B. was taken over by the great Canadian system, then in its own infancy. Mr. Preston, from machinist in 1884, served in various parts of the Dominion, successively, as locomotive foreman; master mechanic and superintendent of motive power on both Western and Eastern Lines. He intends to make his home in Toronto, where he is well known and saw many years of his long service.

He is succeeded by George Whiteley, who has been his assistant since 1915 and also has a long record in the service of the company, having started as fireman, at Fort William, Ont., in 1902. His employment in various posts of the Motive Power Department, however, has taken him all over the Prairies and Eastern Canada.

The post of assistant superintendent of motive power on Eastern Lines will be filled by Alexander Peers, who leaves his appointment as master mechanic of the British Columbia District to come to Montreal for his first experience of service in the East. He joined up as a machinist in the Winnipeg Shops in 1909, and his various posts, hitherto, have all been West of Fort William.

Robert Preston, Superintendent of Motive Power, Eastern Lines Canadian Pacific Railway.

G. Whiteley

Alex. Peers

Crossing Our Fingers Is Not Enough --

1931, just in the offing, will bring business to the merchants who are enterprising and foresighted enough to plan ahead and go after it.

And in planning your program, use the valuable advertising and printing service of The Recorder.

And merchants are finding that more and more people are coming to regulate their shopping by the store ads., and are getting out of the habit of going to the nearest store for their purchases. People are coming to decide things from reading the ads.---and depend upon the news and facts contained in the ads. in planning their purchases.

Business may be harder to get, but it can be had. If you have anything to offer, either in goods or service, your advt. should be in The Recorder.

If Raymond is to forge ahead and become an established trading centre of Southern Alberta, it can only be done by persistently and consistently letting the people know what we have to offer---and then making good with them when they come.

Right now---when others, perhaps, are marking time---is our opportunity to dig in and strengthen our position.

RAYMOND HIGH WINS FROM MAGRATH

It is quite so dangerous. Magrath certainly are deserving of much praise. They were defeated but they were far from disgraced, and they have an aggregation of hoopsters that will make any team set up and take notice. Any team that meets up with them wants to come to the game wide awake and hitting on all cylinders if they expect to make a good showing.

The local suit under the coaching of S. E. Low, are rounding into a real dangerous machine, and able to set a strenuous pace and keep it up. They are developing floor generalship and team work, short passing, and a variety of combinations that keep the best of them guessing.

A good lively game between the girls of Raymond and Magrath High preceded the league game and was umpired by Zemp and Sabey.

The galleries were all full of school students, and their yells made the very walls shake when they belted forth. The main floor was crowded all the way around with a large crowd, all of whom went home well satisfied with the calibre of ball dish ed up.

A jitney dance was held following the game which lasted until midnight and this was well patronized by the young people.

The Lethbridge High will be hosts to our team tonight in Lethbridge, where they play a league game.

OFFICIAL STATEMENT, ETC.

50, 75, and 100 pounds per acre with Marquis wheat on spring ploughed stubble. The fertilizer was drilled in with the wheat with a combination fertilizer grain drill. This same land was seeded to wheat again without further application of fertilizer in 1929. There was no observable difference in the crop in the fertilized and unfertilized plots in either year on this field and no increase in yields from the use of the fertilizer.

TEST OF 1929

In 1929 a fertilizer drill was not available and the fertilizer was seeded broadcast and harrowed in. Plots of Marquis wheat were seeded on summer-fallow. Triple phosphate at the rate of 100 pounds per acre, ammonium sulphate at the rate of 100 pounds per acre and potassium sulphate at the rate of 75 pounds per acre were applied, also a combination of 100 pounds of each of these salts were used. In addition to these plots on summer fallow a test was run on spring ploughed sunflower stubble. Plots with one hundred pounds per acre of ammonium phosphate and a mixture of 100 pounds each of triple superphosphate, ammonium sulphate and potassium sulphate were seeded. Triplicate plots were used in all cases.

All the fertilized plots, except those receiving potassium sulphate only, showed better growth than the unfertilized plots from the time five leaves appeared until the middle of July. After July 22nd no difference was noticeable except on the sunflower stubble where the fertilized plots continued to have a more vigorous appearance throughout the season.

There was no difference in yields on the summer-fallow that could be attributed to fertilizer influence, but on the plots seeded on sunflower stubble there was an average increase of about 5 bushels per acre from the fertilized plots as compared to the unfertilized plots.

TEST OF 1930

In 1930 the same applications as used the previous year were made on summer-fallow except that the fertilizer was drilled in with the wheat with a combination drill instead of being broadcasted on the surface.

The grain that received superphosphate alone or in combination with other salts tillered more and made noticeably better growth than the grain on unfertilized plots, ripened seven days earlier and gave an average yield of 2.7 bushels of wheat more than the unfertilized plots.

The plots sown on summer-fallow in 1929 were again planted to wheat

Everybody's friend! That's Will Rogers and he'll be here to entertain you next Monday, Tuesday and Wednesday at the Capitol Theatre in "Lightnin'" his latest comedy drama for Fox Movietone which is said to surpass his two previous talkie hits, "They Had To See Paris" and "So This is London."

Adapted from John Golden's most successful stage play, "Lightnin'" has plenty of laughs and stirring drama combined with sparkling interpolations by the internationally famous wit and humorist who gives the low down and inside on Reno and divorce.

Louise Dresser leads the supporting cast which includes such notable names as Helen Cohan, youngest daughter of George M. Cohan, Joel McCrea, J. M. Kerrigan, Sharon Lynn, Jason Roberts and Joyce Compton. In addition to a score of gorgeously gown ed divorcees.

The picture was directed with rare understanding by Henry King, distinguished as a "Gold Medal" director.

Be sure to be on hand when "Lightnin'" strikes—full of laughter. "Lightnin'" will electrify you.

FACTORY RUN FINISHED WEDNESDAY

to the growers.

There may be other industries that would pay as well for the time and labor expended as does the Sugar beet industry, but we haven't these other things. We have the Factory and we know that Farmers of Raymond and district will not send the officials begging for beets, especially after the experiences of this year and our disappointment in the wheat racket.

without fertilizing to test the residual effects of the fertilizers. Certain plots in this series that were not fertilized in 1929 received an application of 100 pounds each of ammonium sulphate, potassium sulphate, superphosphate and some plots received 100 pounds of ammonium phosphate.

The yields on the stubble land were 4.0 bushels greater for the combination of superphosphate, ammonium sulphate and potassium sulphate and 3.5 bushels greater for ammonium phosphate applied in the spring with the seed than on the check plots.

There was no important residual effect noticeable from the fertilizer applied the previous year.

Weed growth was not serious on any of these plots so the possible influence on weed growth of the greater tillering and increased vigor of the wheat plants was not an important factor in these experiments.
